* The Study Association was founded after reports in the newspaper and an enquiry by independent research bureau Bezemer and Schurer which all concluded a toxic learning environment. Due to being one of the whistleblowers I was asked by the director to take place in new to form study council which is able to organize extracurricular events and have a voice right upwards the dean and director. By collaborating we made even many employees felt relieved over the new constructional direction.

Information on private life

Family

My sister Sara is 2 years older than me. And she gave birth to two daughters Hanna en Lauren. Daan is my 3 year younger brother he also has a daughter called Nova.

Hobbies

Reading, Creative Home-Projects, Constructing, Signpainting, Playing (Board) Games, Photographing

Favorite activities

At home I like to do projects that are related to creativity. I love to bake or cook dinner for family and friends. I enjoy cooking together or their company while letting them taste the things I love. Sometimes we play a board-game as well. If I'm alone I'm always in search for developing some skills and also newness in my home. This derives mostly from upcycling goods or construct it from scratch. With my ability of craftsmanship I like to give it a personal touch.

Favorite quote

'With my eyes towards the past, I walk backwards into the future.'
- Yohji Yamamoto

Guilty 'Design' Pleasure

Nijntje / Miffy, when my first neice grew up one of the first words she spoke is 'Nijntje'. She loved to watch it and silently cuddling up to who watched it with her. It opened my eyes due to the effectivity and simplicity of form. Although she's four years old now, she still loves it, and I'm with her.
